

One Turnkey ePublishing System

GalaxyLibrary™ is an end-to-end ePublishing system designed to fit your specific business needs, with automatic content conversion and complete management and distribution of digital content. The common thread running through each of the GalaxyLibrary service offerings (Publisher, Star Retailer, Planet Retailer, Galaxy Private Library) is the ability to turn raw content into usable information – with minimal work and maximum control.

Choose the Right Solution for Your ePublishing Program

GalaxyLibrary offers several system configurations to give content owners complete control of their ePublishing programs. All solutions include advanced conversion tools, distribution in 22 formats/devices, 4 DRM choices, sales in multiple currencies, 24x7 reporting, and monthly royalty payments.

	Submit Unlimited Content	Branded Retail Storefront	HomePage Display Control	Free Online Reading	Control What Content is Accessible	Private Access to Content
Content Owner (e.g. Publisher, Artist) \$200*	✓

**Galaxy Private Library \$7,000	✓	✓	✓	Time Limited for Retail Unlimited time for subscribers	✓	✓

* Set up fee waived till August 2002

**Includes one subscription list. Additional subscription lists start at \$1,200/year for 500 subscribers. \$1,200 yearly renewal fee for each subscription list..

Standard Publisher

Our basic ePublishing service for content owners - produce, manage and sell content through the intuitive GalaxyLibrary backend system with or without DRM. Link to your eBook product pages from any website. GalaxyLibrary handles all the transactions, with monthly royalty payments and 24/7 online reporting.

Star Retailer

With a custom branded retail storefront, publishers and retailers can sell their own works as well as the entire repository of titles in the GalaxyLibrary system. Match the look and feel of an existing website with complete access to all GalaxyLibrary titles.

Planet Retailer

The Planet level custom branded retail site provides complete control of GalaxyLibrary content access, with a customized selling environment. Organizations can supplement their own publications with selected content from the GalaxyLibrary network.

Galaxy Private Library

The Galaxy Private Library is for organizations that desire to offer their own content to specifically targeted audiences. Content can be segmented for defined subscriber lists using this custom branded, fully configurable system. You have complete control of GalaxyLibrary content access, with unlimited online reading, and flexible password user access. Database programming options are available for establishing subscriptions, various levels of memberships, and special offers.
